

YAML pipeline likhte time agar sirf steps bhi likhe toh by default andar me ek job bn jata hai jo kisi agent par chlta hai...

Pipeline - Sequence of tasks, clubbed inside jobs that can run on different agents..

Agent job level pr allocate karte hai...

Advantages of Jobs

1. Multiple agents use kar sakte hai.
2. Parallel Execution
3. Dependency set kar sakte hai
4. Logs readability become easy
5. Isolation
