

Recap

Pipeline ke andar jobs hote hai... aur jobs ke andar task hote hai..

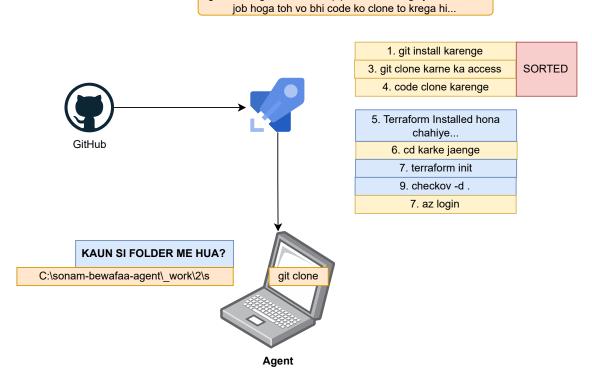

Alg alg job... alg alg agent pr chl sakte hai...

Ek job ke andar multiple task ho sakte hai...

Task ke example hote hai jaise ki Powershell pr kuch chalana, command promt pt kuch chalana etc...

Ek pipeline kitni bhi baar chl sakti hai.. jitni baar bhi pipeline chlegi utni baar us pipeline ke andar dale hue sab jobs execute honge..

Agar hum log ek dum khali pipeline banaenge jisme ek khali

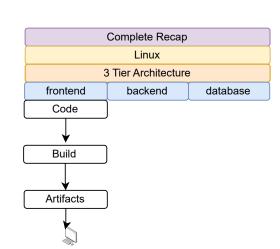

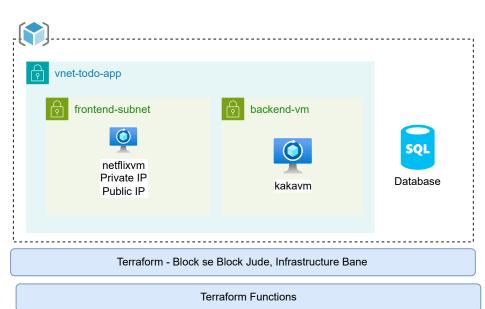

Home Work

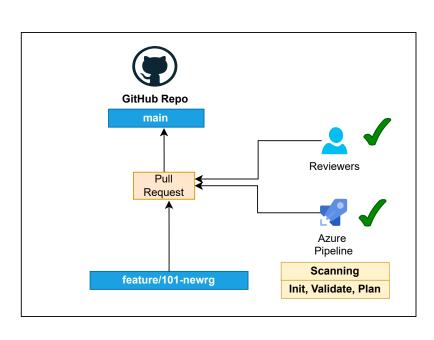

Service Principle kya hota hai? Kaise banate hai? Rights kaise dete hai?

Service Principle se az login kaise karte hai..

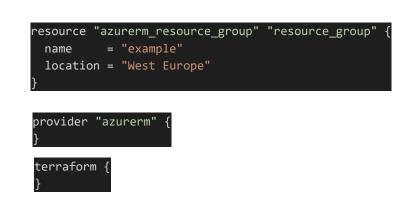

fir init plan apply chala denge...

Humko Log analytics workspace ka ek child module banana hai aur do workspace banana hai, ek nonprod and ek prod ka...

Bina Interview Job Nahi hoga... Yaha Gyan nahi Naukri lene aae hai!
