Pipeline Prerequisites
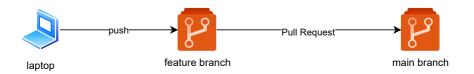

1. Agent is Online. In not, ./run.cmd se ho jaega

2. Service Connection check karna... and access hona chahiye..

3. Code repo me properly hona chahiye

laptop → push → feature branch → Pull Request → main branch

Requirements

1. jaise hi feature branch me push kie, automatic pipeline feature branch se chlna chahiye

2. Pipeline plan tak hi chlna chahiye (matlab pipeline me condition hoga, pipeline feature branch se chle aur plan succeeed ho tabhi reviewer isko merge kar paega, plan ke aage jae hi nahi...)

YAML pipeline likhte time agar sirf steps bhi likhe toh by default andar me ek job bn jata hai jo kisi agent par chlta hai...
